Oregon’s Nearshore Marine Resources Management Strategy was developed by many individuals, agencies, and organizations. Any work that addresses the complexity and dynamics of the nearshore ocean, and the values and uses that Oregonians apply to it, must be created through the interactive efforts of many people. Their constructive participation has helped to build a whole that is greater than the sum of its parts.

We thank the following people and organizations for their tremendous effort, vision and insight:

Oregonians
