**Fiscal and Economic Impact Statement for the January 7, 2011 Hearing
In the Matter of Rules Relating to Food Fish Values Used in
Determining Damages for Commercial Fishing Violations**

Fiscal and economic impact: The proposed rules will affect state agencies, units of local government and the public, respectively, as discussed below:

A. The only state agency that would be affected by adoption of these rules is the Oregon Department of Fish and Wildlife. No significant changes from the current levels of the department's operations or expenditures are expected as a result of the adoption of these rules.

B. No units of local government are expected to be affected by these rules. No significant changes from the current levels of any local agencies' operations or expenditures are expected as a result of the adoption of these rules.

C. The public could be affected by the adoption of these rules: The persons or businesses most likely to be affected are those who may be assessed damages for commercial fishing violations. The proposed amendments would replace the existing values with updated values. The changes could increase or decrease the damages depending on the species under consideration, and the market prices for those species in the last year. Overall, it is unlikely that there will be large changes in the magnitude of the total damages that would be incurred.

Most businesses affected by these rules are believed to be "small business."

The rules are believed to be fully compatible with legislative direction on the goals of wildlife management in Oregon.

We do not believe that a less intrusive or less costly alternative adaptation to only small business is consistent with the purpose of the rule.
