Other Authority:**Statutes Implemented:**

ORS 496.012, 496.138, 496.146, 496.162, 498.002

RULE SUMMARY

Amend rules regarding the harvest of game birds including 2017-2018 season dates, open areas, regulations, and bag limits.

The Agency requests public comment on whether other options should be considered for achieving the rule's substantive goals while reducing negative economic impact of the rule on business.

Amendments Regarding Harvest of Game Birds, Season Dates, Open Areas, and Bag Limits

Rule Caption (Not more than 15 words that reasonably identifies the subject matter of the agency's intended action.)

In the Matter of:

OAR Chapter 635, Amendments Regarding Harvest of Game Birds, Season Dates, Open Areas, and Bag Limits

Statutory Authority:

ORS 496.012, 496.138, 496.146, 496.162, 498.002

Other Authority:

Statutes Implemented:

ORS 496.012, 496.138, 496.146, 496.162, 498.002

Need for the Rule(s):

These rules are needed to establish hunting seasons for game birds in a manner to maintain their number at optimum levels and prevent their serious depletion so as to provide optimum recreational benefits for present and future generations of citizens of this state.

Documents Relied Upon, and where they are available:

Draft rules are available from the division's rules coordinator, located at 4034 Fairview Industrial Drive, SE; Salem, Or 97302. Rules are also on the ODFW website at <http://www.dfw.state.or.us/OARs/index.asp>.

Fiscal and Economic Impact:

Rules are proposed to set the 2017-18 seasons for upland and migratory game birds in accordance with the stabilized upland game bird season framework for September 1, 2015 to August 31, 2020 and final federal frameworks for migratory game bird seasons.

Fiscal and economic impacts discussed in this document pertain only to the proposed rules at the time of the writing of this FIS.

Statement of Cost of Compliance:

1. Impact on state agencies, units of local government and the public (ORS 183.335(2)(b)(E)):

The proposed rules will affect state agencies, units of local government, and the public, respectively, as discussed below:

A. State agencies which could be affected by rules relating to game bird hunting seasons are the Oregon Department of Fish and Wildlife (ODFW) for wildlife management costs and license sales revenues and the Oregon State Police for enforcement costs. No significant changes are expected to regulations pertaining to game bird seasons or hunting opportunity and thus no significant effects on costs or revenues are anticipated.

B. No units of local government are expected to be affected by these rules. No significant changes from the current levels of any local agencies' operations or expenditures are expected as a result of these particular rules.

C. The public is affected by rules relating to game bird hunting seasons. Various sectors of the public economy (hunters, suppliers of hunting equipment, and the general economy) can experience different impacts, though no significant impacts are expected to result from proposed rule changes/updates.

Annual hunting trip and equipment expenditures associated with migratory bird hunting and upland bird hunting (excluding turkey hunting) in Oregon were an estimated \$55.2 million (2016\$) and \$53.9 million (2016\$), respectively, in 2006 (U.S. Fish and Wildlife Service, 2008 and International Association of Fish and Wildlife Agencies, 2007). Annual retail sales associated with wild turkey hunting were approximately \$15.4 million (2016\$) in 2006¹ (U.S. Fish and Wildlife Service, 2008). The 2006 USFWS survey results are used here because the 2011 USFWS survey utilized a smaller sample size than in 2006 and, as a result, the sample size for expenditures for migratory bird hunting was too small (less than 10) to report data reliably. The total (direct, indirect and induced) effects on personal income in the areas surrounding the game bird hunting areas (and statewide) are the result of purchases of goods and services made by sportspeople. Through the "multiplier

process", there is an increase in overall economic activity and personal income in the general economy associated with the retail sales made to hunters.

The rules relating to game bird hunting seasons could be viewed as reducing positive economic impacts in the short run, compared to an unrestricted situation. However, conservation through the use of a seasonal framework is intended to perpetuate these wildlife resources at optimal levels in the long run. Failure to restrict harvests of game birds to allow escapement for reproduction would result in severe adverse economic effects in the future. The proposed regulations attempt to strike a balance, which will sustain wildlife population levels and maintain future benefits.

International Association of Fish and Wildlife Agencies. 2007. Economic Importance of Hunting in America. Washington, DC.

US Fish and Wildlife Service. 2008. 2006 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation, Oregon State Report. U. S. Department of the Interior, Fish and Wildlife Service and U.S. Department of Commerce, U.S. Census Bureau.

(1) The National Survey groups wild turkey with the big game category. The \$15.4 million estimate was made by prorating big game expenditures in direct proportion to the number of wild turkey hunting days in the field estimated in the survey. The estimate is somewhat uncertain because of the small sample size of turkey hunters in the survey.

(2) Wild turkey were not included in the personal income estimates provided by the International Association of Fish and Wildlife Agencies.

2. Cost of compliance effect on small business (ORS 183.336):

a. Estimate the number of small business and types of businesses and industries with small businesses subject to the rule:

The types of business subject to the rule are those that supply goods or services to bird hunters. These may include taxidermy services, hunting guides, private hunting preserve operators, food and beverage stores, gasoline stations, sporting goods stores, general merchandise stores, accommodation businesses, food services and drinking places. Game bird hunting (upland, waterfowl, turkey) occurs in myriad locations throughout the state and thus the number of small businesses subject to the rule cannot be estimated.

b. Projected reporting, recordkeeping and other administrative activities required for compliance, including costs of professional services:

None expected.

c. Equipment, supplies, labor and increased administration required for compliance:

None expected.

How were small businesses involved in the development of this rule?

Not applicable.

Administrative Rule Advisory Committee consulted?: No

If not, why?:

The draft administrative rules relating to hunting seasons were developed without a committee. These rules are amended annually in a public format to administer existing programs and hunting seasons; interested and affected persons are generally aware of this rulemaking schedule. Correspondence from and testimony by interested and affected persons is accepted into record as part of the rulemaking process. These regulation proposals do not vary significantly from rules previously in effect.
