Dear Chair Wahl and members of the Commission,

As an Oregon resident, I oppose the proposed increase in spring bear tags in the Starkey-Ukiah and Southern Blue Mountains units, and the addition of a youth spring bear hunt in the Alsea-Stott Mountain units. I support the end of the spring bear hunting season entirely. Hunting bears in the spring is unfair and unsporting, as bears are lethargic as they emerge from hibernation, and young cubs are inevitably orphaned and left to die from starvation, predation or exposure to harsh weather. Oregon is one of only seven states that allow spring bear hunting, out of the more than 30 states that allow bear hunting.

Additionally, Oregon has no rule about how frequently traps that are set for bears for damaging property, crops, animals in agriculture, or are seen as a public nuisance or health concern need to be checked. This means bears could be left to suffer in traps for days or even weeks. I support instituting a mandatory trap check time of 48 hours for all game mammals, including bears and cougars, who are trapped for causing damage under ORS 498.012. A 48-hour trap check time for game mammals would align with trap check times for other species in Oregon. Trapped bears experience pain, shock and dehydration until they are killed, and this is not in line with the Oregon public's values.

Thank please no spring bear hunts. Bears are not a problem in OR. More people are injured by deer! Thank you for your consideration!

Subject: Support of Proposed 2025 Game Regulations

Dear ODFW Commission:

As a hunting license holder, and a dedicated stakeholder in the Oregon Department of Fish and Wildlife (ODFW), I urge you to adopt the 2025 big game regulations as recommended by your professional staff. The ODFW biologists have acted in accordance with their statutory obligations under ORS 496.012, proposing regulations that ensure species are maintained at optimal levels while also maximizing recreational benefits.

I oppose suggestions from politically motivated groups advocating for the elimination of the spring bear season. The Integrated Population Model confirms that Oregon's bear populations are robust and expanding, and continued hunting opportunities support balanced predator-prey dynamics. With a spring hunting success rate of only 17%, and with 70% of the harvested bears being males, it is clear that managed spring bear hunting contributes positively to maintaining a stable and healthy population.

I respectfully request that you implement the big game regulations as recommended by the ODFW professional staff.

Sincerely,

Sam Cornelius

Dear Commission Members,

My name is Joshua Hampton. I am a lifetime citizen and avid hunter and fisherman in Oregon. I am writing you in response to the proposed regulation changes for the 2025 hunting season as I will be unable to attend the meeting in person. I am full support of all of the proposed changes, especially the increase in bear tags and the creation of the youth hunt. Contrary to some of the dissenting opinions that I have seen, these hunts are not inhumane and are one of the best opportunities that hunters have to help control our ever growing bear population. The calls for ending our spring bear season are completely unfounded and are based on rigged studies and assumptions made by those who don't actually understand how bear hunting works. I would be in favor of an even larger increase in tags, as well as bringing back baiting and hound hunting for predators. Thank you for taking the time to hear my opinion.

Thank You,
Joshua E. Hampton

Subject: Spring bear hunt supports conservation and sustainability.

Dear ODFW Commission,

The spring bear hunt in Oregon is an important part of responsible wildlife management. Hunters provide essential data to biologists, who use this information to monitor the health and sustainability of the bear population. The 2025 recommendations from ODFW reflect a science-based approach to managing Oregon's growing bear population. Anti-hunting pressure should not interfere with these data-driven decisions. Please adopt the 2025 regulations and ensure the continuation of the spring bear hunt.

Sincerely,
John McCoy

Dear Chair Wahl and members of the Commission,

As an Oregon resident, I oppose the proposed increase in spring bear tags in the Starkey-Ukiah and Southern Blue Mountains units, and the addition of a youth spring bear hunt in the Alsea-Stott Mountain units. I support the end of the spring bear hunting season entirely. Hunting bears in the spring is unfair and unsporting, as bears are lethargic as they emerge from hibernation, and young cubs are inevitably orphaned and left to die from starvation, predation or exposure to harsh weather. Oregon is one of only seven states that allow spring bear hunting, out of the more than 30 states that allow bear hunting.

Additionally, Oregon has no rule about how frequently traps that are set for bears for damaging property, crops, animals in agriculture, or are seen as a public nuisance or health concern need to be checked. This means bears could be left to suffer in traps for days or even weeks. I support instituting a mandatory trap check time of 48 hours for all game mammals, including bears and cougars, who are trapped for causing damage under ORS 498.012. A 48-hour trap check time for game mammals would align with trap check times for other species in Oregon. Trapped bears experience pain, shock and dehydration until they are killed, and this is not in line with the Oregon public's values.

Thank you for your consideration!

Subject: Support the 2025 Big Game Season Recommendations

Dear Commissioners:

As an Oregon resident, hunting license holder, and a dedicated stakeholder in the Oregon Department of Fish and Wildlife (ODFW), I urge you to adopt the 2025 big game regulations as recommended by your professional staff. The ODFW biologists have acted in accordance with their statutory obligations under ORS 496.012, proposing regulations that ensure species are maintained at optimal levels while also maximizing recreational benefits.

I oppose suggestions from politically motivated groups advocating for the elimination of the spring bear season. The Integrated Population Model confirms that Oregon's bear populations are robust and expanding, and continued hunting opportunities support balanced predator-prey dynamics. With a spring hunting success rate of only 17%, and with 70% of the harvested bears being males, it is clear that managed spring bear hunting contributes positively to maintaining a stable and healthy population.

I respectfully request that you implement the big game regulations as recommended by the ODFW professional staff.

Sincerely,

Brian McCall

Hello,

I recently learned that there is a proposal for the Oregon Spring Bear hunt to be banned. I have never been a hunter but I respect hunters and nonhunters alike. I believe that hunters care more about the land and the animals that live on the land more than others. Their hobbies depend on the thriving of land and animals, which in part, includes the ability to hunt. The state does a good job limiting the number of tags sold and restricts hunters to specific times throughout the year among other restrictions to ensure that the population is thriving and isn't overkilled. Please listen to those that know their stuff and do not place a ban on the Spring Bear hunt here in Oregon.

Thank you for your time,

Krista Washington
Oregonian

Dear ODFW Commission,

Science is at the core of good wildlife management and conservation. I strongly support ODFW's work to establish hunting seasons unimpeded by political pressure.

The Oregon spring bear hunt plays an essential role in wildlife management. Black bears are a thriving species in Oregon, and without proper management, their growing population can lead to overpopulation and increased human-wildlife conflicts. The spring bear hunt is conducted with a high level of regulation and oversight to ensure it remains sustainable.

From a broader perspective, the Oregon Spring Bear Hunt supports local communities, contributing to the economy through hunting-related activities such as tourism, gear sales, and guiding services. Hunting also instills a deeper connection to nature and fosters a conservation ethic among hunters, many of whom actively support habitat preservation and wildlife conservation efforts. This tradition, when practiced responsibly, not only enhances the well-being of Oregon's natural environment but also promotes the sustainable use of its resources for generations to come.

Sincerely,
Johan Oskarsson

Subject: Stand Up for Oregon Hunting and Science-Based Wildlife Management!

Dear ODFW Commission Commission,

As a proud conservationist and advocate for Safari Club International, I am writing in support of the recommendations of the Oregon Department of Fish and Wildlife staff with regard to continuing the spring bear season, increasing bear licenses in northeastern Oregon, and creating a youth bear hunting opportunity in the Alsea-Stott units. With the bear population growing from an estimated 34,000 in 2020 to 44,000 in 2024, the data demonstrates that the species is healthy and expanding, yet ODFW's recommendations remain conservative, underscoring the commitment to long lasting scientifically based wildlife conservation.

SCI believes that sound science-based conservation involving hunting as the primary management tool, while maximizing opportunities for all huntable species, including carnivores such as black bears or mountain lions, is necessary to the long-term health of wildlife. Hunters have long paid the way for conservation, both game and non-game wildlife, and maximizing opportunity for hunting is also key to long-term funding for all conservation. Hunting benefits wildlife conservation.

Thank you for the opportunity to comment on the proposed recommendations of the professional staff of ODFW regarding black bear hunting. SCI is dedicated to protecting the freedom to hunt and is always First For Hunters.

Sincerely,

Marcia Baker

Subject: Protect spring bear hunting in Oregon with sound management.

Dear ODFW Commission,

It's important that we continue to manage Oregon's black bear population with science-based regulations. The spring bear hunt is essential for this, and I support the 2025 recommendations to keep this hunt in place.

Sincerely,
Jared Neiss

Subject: Help protect sustainable hunting in Oregon.

Dear ODFW Commission,

Oregon's spring bear hunt is vital for maintaining healthy bear populations and supporting wildlife management goals. Hunters provide data that helps biologists monitor population dynamics, ensuring that hunting remains sustainable. The 2025 regulations proposed by ODFW are science-based and should be supported. Closing the spring bear season would harm both the bear population and the broader ecosystem. Please stand with the biologists and adopt the 2025 recommendations.

Sincerely,
Debbe Klaja
