Sent: Tuesday, September 10, 2024 7:28 PM
To: ODFW Commission * ODFW
Subject: Don't let anti-hunters end Oregon's spring bear hunt!

Dear ODFW Commission,

I support the continuation of Oregon's spring bear hunt as outlined in the 2025 big game regulations. The data shows that Oregon's black bear population is healthy and growing, and this hunt helps manage that growth responsibly. Hunters play a critical role in collecting data that ensures biologists can track population trends and make informed decisions. The spring bear hunt is sustainable and should be protected from political interference. Please adopt the 2025 recommendations and continue the spring bear hunt.

Sincerely,
Cara Humphreys

Subject: Support the continuation of Oregon's spring bear hunt!

Dear ODFW Commission,

I fully support the continuation of Oregon's spring bear hunt as recommended by ODFW biologists. This hunt is based on sound population data and plays a crucial role in managing the state's growing bear population. Hunters provide essential data that helps biologists track population dynamics and ensure sustainable management. It's important that we follow the science and not political pressure when making these decisions. Please adopt the 2025 regulations and continue the spring bear season.

Sincerely,
Travis France

Sent: Tuesday, September 10, 2024 7:18 PM
To: ODFW Commission * ODFW
Subject: Protect spring bear hunting in Oregon with sound management.

Dear ODFW Commission,

I urge the commission to adopt the 2025 big game regulations and continue the spring bear hunt in Oregon. This hunt is a key part of responsible wildlife management, and the data supports its sustainability.

Sincerely,
Connor Rock

BORISCH Roxann B * ODFW

From: Tyler Thede <civinput@newmode.org>
Sent: Tuesday, September 10, 2024 7:18 PM
To: ODFW Commission * ODFW
Subject: Ensure Oregon's bear population remains sustainable.

Dear ODFW Commission,

Oregon's black bear population has grown steadily, and the spring bear hunt is an essential tool for managing that growth. The data collected from hunters allows biologists to monitor population health and sustainability. The 2025 regulations are based on this science and should be adopted to ensure continued responsible wildlife management. Closing the spring bear season would ignore the valuable data that supports its continuation. I urge you to support the 2025 regulations and keep the spring bear hunt.

Sincerely,
Tyler Thede

Sent: Tuesday, September 10, 2024 7:18 PM
To: ODFW Commission * ODFW
Subject: Support hunters and conservation: keep Oregon's spring bear hunt

Dear ODFW Commission,

Hello,

I am emailing to express my support of the 2025 recommendations for the spring bear hunt because they are based on science, not politics. The data shows that Oregon's black bear population is thriving, and the hunt is a key tool for managing it. Hunters provide essential data to help biologists track the health of the bear population. Without this hunt, we risk losing vital information that keeps wildlife management on track. Please continue the spring bear hunt and adopt the 2025 regulations.

Sincerely,
Daniel Anderson

Dear ODFW Commission,

I urge the commission to support the 2025 recommendations for Oregon's spring bear hunt. The bear population is thriving, and this hunt is a key tool for maintaining a healthy balance in our wildlife. Hunters provide critical data that helps biologists track population trends and ensure sustainable management. The spring bear season is carefully regulated to ensure it aligns with the best available science.

The mission statement of ODFW reads "Our mission is to protect and enhance Oregon's fish and wildlife and their habitats for use and enjoyment by present and future generations." Biologists at the Oregon Department of Fish and Wildlife follow this mission statement when using the best science to make all of their management recommendations. This includes recommending an increase in bear tags and the continuation of Oregon's spring black bear season. In staying true to their mission statement they must feel that Oregon's bear population is healthy enough to support this increase and still ensure the enhancement of future populations and enjoyment by future generations.

Please follow the data and continue to support this vital hunting season.

Sincerely,
Mathew Vargas

Dear ODFW Commission,

Oregon's spring bear hunt is backed by years of scientific data and is an essential part of wildlife management. Hunters play a crucial role in gathering data that biologists use to track population trends and ensure sustainable management. The 2025 big game regulations reflect a careful balance between conservation and hunting opportunities. Reducing or eliminating this hunt would undermine the valuable data that supports its continuation. I urge you to adopt the 2025 regulations and protect the spring bear hunt for future generations.

Sincerely,
Brian Hidden

Sent: Tuesday, September 10, 2024 6:42 PM
To: ODFW Commission * ODFW
Subject: Stand Up for Oregon Hunting and Science-Based Wildlife Management!

Dear ODFW Commission Commission,

As a proud conservationist and advocate for Safari Club International, I am writing in support of the recommendations of the Oregon Department of Fish and Wildlife staff with regard to continuing the spring bear season, increasing bear licenses in northeastern Oregon, and creating a youth bear hunting opportunity in the Alsea-Stott units. With the bear population growing from an estimated 34,000 in 2020 to 44,000 in 2024, the data demonstrates that the species is healthy and expanding, yet ODFW's recommendations remain conservative, underscoring the commitment to long lasting scientifically based wildlife conservation.

SCI believes that sound science-based conservation involving hunting as the primary management tool, while maximizing opportunities for all huntable species, including carnivores such as black bears or mountain lions, is necessary to the long-term health of wildlife. Hunters have long paid the way for conservation, both game and non-game wildlife, and maximizing opportunity for hunting is also key to long-term funding for all conservation. Hunting benefits wildlife conservation.

Thank you for the opportunity to comment on the proposed recommendations of the professional staff of ODFW regarding black bear hunting. SCI is dedicated to protecting the freedom to hunt and is always First For Hunters.

Sincerely,

Mitch Tough

Subject: Protect Oregon's bear populations with sustainable hunting.

Dear ODFW Commission,

I urge the commission to support the 2025 recommendations for Oregon's spring bear hunt. The bear population is thriving, and this hunt is a key tool for maintaining a healthy balance in our wildlife. Hunters provide critical data that helps biologists track population trends and ensure sustainable management. The spring bear season is carefully regulated to ensure it aligns with the best available science. Please follow the data and continue to support this vital hunting season.

Sincerely,
Alexander Zaleski

Subject: Don't let anti-hunters end Oregon's spring bear hunt!

Dear ODFW Commission,

The spring bear hunt is a key part of Oregon's wildlife conservation strategy. The 2025 regulations are based on robust data and reflect the best practices for managing black bear populations. Hunters provide invaluable data through harvest reports that allow biologists to track the health and size of bear populations. This data shows that the hunt is sustainable and necessary for maintaining balance in the ecosystem. Please continue the spring bear season by supporting the 2025 regulations.

Sincerely,
Carl Walton

Subject: Protect the future of Oregon's spring bear hunting season.

Dear ODFW Commission,

Oregon's spring bear hunt is an essential part of responsible wildlife management, and I fully support the 2025 recommendations. Biologists use the data from this hunt to track bear populations and ensure that hunting practices are sustainable. Reducing or eliminating this hunt would ignore the best available scientific data and harm Oregon's wildlife management efforts. Hunters play a key role in gathering data that cannot be obtained through any other means. Please support the 2025 regulations and protect the spring bear hunt for future generations.

Sincerely,
John Farnsworth

Dear ODFW Commission,

The spring bear hunt is an important wildlife management tool in Oregon. Hunters play a vital role in collecting data that helps biologists make informed decisions about population health. The 2025 regulations reflect a responsible approach to managing Oregon's growing bear population. Without this hunt, there could be negative impacts on other wildlife species as well. Please support the biologists' recommendations and continue the spring bear hunt.

Sincerely,
Patrick Cioffi

Dear ODFW Commission,

The spring bear hunt in Oregon is a necessary tool for managing the state's growing bear population. The data collected by hunters is critical for ensuring the health and sustainability of this population. The 2025 big game regulations proposed by ODFW are based on solid science and should be adopted to protect Oregon's wildlife. Anti-hunting pressure should not interfere with these data-driven recommendations. Please support the spring bear hunt and keep Oregon's wildlife management grounded in science.

Sincerely,
Robert Crook

Subject: Stand Up for Oregon Hunting and Science-Based Wildlife Management!

Dear ODFW Commission Commission,

As a proud conservationist and advocate for Safari Club International, I am writing in support of the recommendations of the Oregon Department of Fish and Wildlife staff with regard to continuing the spring bear season, increasing bear licenses in northeastern Oregon, and creating a youth bear hunting opportunity in the Alsea-Stott units. With the bear population growing from an estimated 34,000 in 2020 to 44,000 in 2024, the data demonstrates that the species is healthy and expanding, yet ODFW's recommendations remain conservative, underscoring the commitment to long lasting scientifically based wildlife conservation.

SCI believes that sound science-based conservation involving hunting as the primary management tool, while maximizing opportunities for all huntable species, including carnivores such as black bears or mountain lions, is necessary to the long-term health of wildlife. Hunters have long paid the way for conservation, both game and non-game wildlife, and maximizing opportunity for hunting is also key to long-term funding for all conservation. Hunting benefits wildlife conservation.

Thank you for the opportunity to comment on the proposed recommendations of the professional staff of ODFW regarding black bear hunting. SCI is dedicated to protecting the freedom to hunt and is always First For Hunters.

Sincerely,

David Everson
