

Columbia Basin Partnership Task Force Phase 2 (Final) Report and Recommendations

October, 2020

Unique Aspects of Partnership

- The Partnership took a basinwide approach to Columbia River salmon and steelhead from the ocean to the spawning grounds for natural and hatchery-origin fish.
- The Partnership brought stakeholders and sovereign managers together. The diverse members have not all been at one table before. This approach allowed for learning and joint problem solving, and constructive relationship-building.

MAFAC CBP TASK FORCE

Qualitative Goals

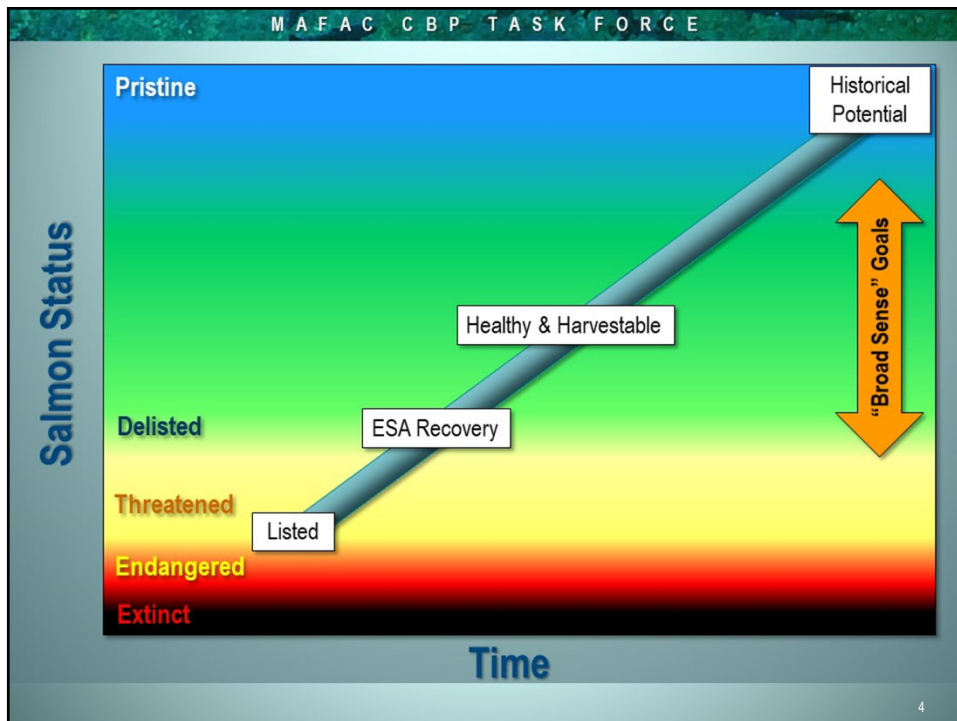

Natural Production:
Restore salmon and steelhead in the Columbia Basin to healthy and harvestable/fishable levels.

Harvest/Fisheries:
Provide diverse, productive, and dependable tribal and non-tribal harvest and fishing opportunities for Columbia Basin salmon and steelhead in fresh and marine waters.

Hatchery/Mitigation:
Produce hatchery salmon and steelhead to support conservation, mitigate for lost natural production, and support fisheries, in a manner that strategically aligns hatchery production with natural production recovery goals.

Social, cultural, economic, and ecological considerations:
Make decisions within a broader context that reflects and considers effects to the full range of social, cultural, economic, and ecosystem values and diversity in the Columbia Basin.
