

Table 3 (CORRECTED). Relative coho smolt production capacity of summer and winter habitat in streams in the Oregon Coastal coho ESU.

Population Unit	Summer Smolt Capacity With No Temperature Limitation	Summer Smolt Capacity With Temperature Limitation	Winter Smolt Capacity Based on Total Available Habitat	Winter Smolt Capacity Based on High Quality Habitat	Ratio of Summer Smolt Capacity Relative to Total Winter Capacity With No Summer Temperature Limitation	Ratio of Summer Smolt Capacity Relative to High Quality Winter Habitat Capacity With No Summer Temperature Limitation	Ratio of Summer Smolt Capacity Relative to Total Winter Capacity With Summer Temperature Limitation	Ratio of Summer Smolt Capacity Relative to High Quality Winter Habitat Capacity With Summer Temperature Limitation
Necanicum	210,422	145,191	65,498	12,844	3.2	16.4	2.2	11.3
