Clackamas, OR 97015
Building 16 – Basement Conference Room

4:00PM-7:00PM

Agenda

Discuss and rank recommended management actions, monitoring and research
(Section 11 of the draft Lower Columbia River White Sturgeon Management Plan).

The Plan presents four broad categories of activities: (1) management actions, (2) research to assess the effectiveness of management actions, (3) monitoring to characterize status and trends of biological attributes, and (4) research to address critical unknowns and data gaps. We will review a summary table which consolidates all management actions, monitoring and research identified in the Plan. We will determine appropriate priorities and timeframes.
