

At salmon protectiondevice.com we see several projects related to removing dams. We don't need to remove dams. We need to dredge behind them to get the fish ladders working again. If a dam doesn't have a fish ladder, then we need to install one. We need every bit of power we can from the Dams. The Northwest grid is already crashing.

Northwest Region Requirements and Resources

Table 1. Northwest Region Requirements and Resources – Annual Energy shows the sum of the individual utilities' requirements and firm resources for each of the next 10 years. Expected firm load and exports make up the total firm regional requirements.

^{1/} Load net of energy efficiency

^{2/} Firm hydro for energy is the generation expected assuming critical (8%) water condition (the methodology is changed for the 2023 report)

^{3/} More energy may be available from natural gas power plants

A tragic reminder that the “chocolate water” at the Green Peter reservoir below will also become a daily reality at the Iron Gate dam as well.
